

210

Power Station

CT-600054

Our ultra-thin and feature-rich portable power with wireless charging makes it the perfect portable charging option.

- **Wireless Charging on Contact**

Simply place your Qi-enabled smartphone on the top of the 210 Power Station to begin charging your device.

- **Hours of Power**

This small yet powerful portable charger is easy to carry and provides 10,000mAh for peace of mind when on the go.

- **Charge Multiple Devices**

The 18W USB-A output and 18W Type-C PD ports allow for charging two devices or wearables simultaneously while another Qi-enabled device charges wirelessly.

- **Power Indicator**

The LED power indicator displays the current battery charge as a percentage of total capacity, making it easy to know how much power remains before recharging.
